(54) Title: PACKAGE FOR PRESERVING A MEDICAL DEVICE OR THE LIKE

(57) Abstract: The present invention relates to a package for preserving a medical device or the like comprising an external capsule and a cap sealingly engaging the external capsule, wherein a means is provided for releasably connecting medical device with the cap upon removing the cap and the medical device from the external capsule. In a variation the package may comprise in addition a transport means surrounded by the cap and extending therein, wherein the transport means is adapted for releasably connecting to the medical device. Also a seal may be provided at an opening of the external capsule.
